

ATLANTIS

RAIL SYSTEMS

by Suncor

Explorer

Assembled from a patented line of modular railing components, Atlantis Rail is excellent for new or retrofit applications.

This innovative collection provides a unique look that fits any indoor or outdoor design requirements, while allowing unobstructed views.

A History of Excellence

As a division of Suncor Stainless, Inc., a prominent source for stainless steel, Atlantis Rail was developed as a way to offer our patented technology and unrivaled quality in the railing industry. This innovative collection provides a unique look that fits any indoor or outdoor design requirement.

Revolutionary Approach

The Atlantis Rail systems are a revolutionary approach to conventional deck railings. Assembled from a patented line of modular railing components, Atlantis Rail is excellent for new or retrofit applications. Enjoy the streamlined look of our maintenance free railings without obstructing the view. We invite you to enjoy the beauty and durability of 316 stainless steel. Call for a free quote today. Come discover what you've been missing!

Vanguard

Enjoy the streamlined look of our maintenance free railings featuring unobstructed views. Come discover what you've been missing!

Atlantis Rail Systems - Model Summary

The **Nautilus** combines the modern look of stainless steel wire rope and turnbuckles with the maintenance free quality of highly polished or brushed tubing and vinyl post components.

The **Mariner** utilizes vertical stainless steel balusters set into highly polished or brushed stainless tubing providing a strong and durable system.

MicroStar™ LED Lighting

MicroStar™ LEDs are a perfect touch of ambiance to accent the architectural elements of the Atlantis Rail systems. This complete line of small, bright white LED lights are available in both 12v and 24v and each draw .02 amps. Completely waterproof and featuring a bulb life of 100,000 hrs, (7 years of continuous usage) MicroStar™ lights are the ideal addition to any indoor or outdoor railing application.

The **Vanguard** combines the natural beauty of wood with the streamlined look of our patented RailEasy™ turnbuckles and wire rope.

The **Explorer** is the perfect balance between our half inch balusters and your new or existing wooden posts and rails.

The **Orion** is comprised of half inch stainless steel balusters secured with a machined fit into our patented high-density light bar.

The **Triton** includes wire rope/swage stud assemblies running vertically along our stainless steel tubing.

Installation instructions are available online. Also available, is a complete photo gallery of Atlantis installations.

Orion

Nautilus

Add years of long lasting value and longevity to railing systems with the virtually maintenance free SunRail™ system by Atlantis Rail.

SunRail™ is prefabricated to allow quick and easy installation in any outdoor or indoor design situation.

Ease of Installation

This completely 316 stainless steel modular system achieves a custom look without the hassle of welding and polishing. Offering infill options of glass panels, cable, or balusters, as well as the versatility of a highly polished or brushed finish, the SunRail™ system blends nicely with every decor.

The ordering process is so simple; just send us your plan view layout for a quote. Prior to installation, Atlantis engineers will provide complete, detailed drawings. No need to waste time picking individual components. We are ready to make your next project beautiful and easy.

Install Indoor or Outdoor

The streamlined look of SunRail™ provides the enjoyment of unobstructed views and ventilation without compromising the structural integrity.

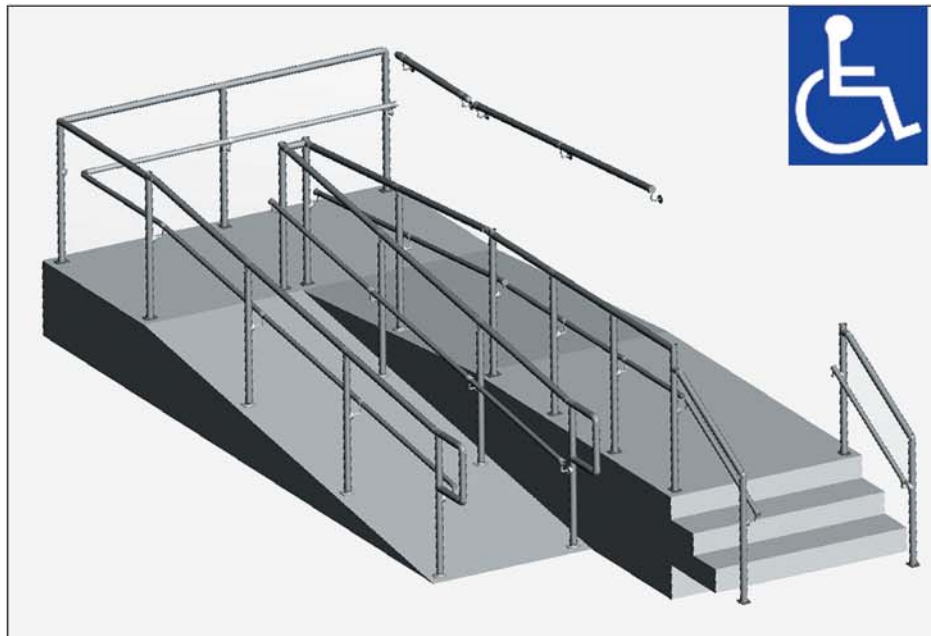

MicroStar™ LED Lighting

Add MicroStar™ LED lighting to illuminate the architectural features of the SunRail™ system. These super bright white lights are ideal for accenting your indoor or outdoor railing application.

We invite you to explore our website. Installation instructions are now available online. Also available, is a complete photo gallery of SunRail™ installations.

SunRail™ Access Rail - ADA Compliant

The SunRail™ Access rail is an innovative approach to handicap railing systems. Completely prefabricated, the Access rail allows for quick and easy installation in any indoor or outdoor applications. The SunRail™ Access rail is fully ADA compliant and made from durable 316 stainless steel, adding years of maintenance free value.

Atlantis Rail Systems

Assembled from a patented line of modular railing components, Atlantis Rail is excellent for new or retrofit applications. Enjoy the streamlined look of our maintenance free railings without obstructing the view.

FEATURES & BENEFITS

- 316 Stainless Steel** Made from extremely corrosion resistant type 316 stainless steel for years of long term value and enjoyment
- Streamlined** Providing unobstructed views and ventilation
- Strength** Offering a safe and durable alternative to wood or aluminum
- Patented Technology** Cable assemblies are connected in the field utilizing our patented RailEasy™ turnbuckles and simple hand tools

SunRail™ - Completely Stainless System

This completely 316 stainless steel modular system achieves a custom look without the hassle of welding and polishing. SunRail™ is prefabricated to allow quick and easy installation for any indoor or outdoor design situation.

FEATURES & BENEFITS

- Versatility** Choice of highly polished or brushed stainless steel finishes which offers versatility as well as a clean, strong look
- Pre-Engineered** For an easy, stress free assembly
- Modular System** Provides a custom look with no welding or polishing required
- Durable** Structurally strong railing frames made with 2" diameter 316 stainless steel tubing. All connecting joints are made using investment cast 316 stainless steel and are precision machined.

Access Rail - ADA Compliant

The SunRail™ Access rail is fully ADA compliant and made from 316 stainless steel, adding years of maintenance free value.

FEATURES & BENEFITS

- Clean, Modern Look** Flush mount fittings allow for a smooth, continuous hand rail. Polished and brushed finishes to fit every decor.
- Modular System** Consists of versatile components which easily adapt to fit every design application while offering a custom look
- ADA Compliant** Make your company compliant with all handicap accessibility laws and building codes
- Ease of Installation** Quick and easy installation in the field using simple hand tools with no welding or polishing required

RailEasy™ turnbuckles are an innovative approach to installing Atlantis Rail's cable rail systems. Turnbuckles and cable are an obvious choice for clean, unobstructed views.

Flat Base

RailEasy™ "flat base" turnbuckles are typically used on Atlantis Rail applications.

Concave Base

RailEasy™ "concave base" turnbuckles are designed for use in SunRail™ applications.

Patented Simplicity

The RailEasy™ turnbuckle features a slotted base which allows the turnbuckle to be angled up to 45 degrees making it ideal for stair applications.

Featuring mechanical swaging capabilities, these tensioners allow installers to cut cable on site, removing the hassle of pre-measuring and the cost of miscalculating dimensions. RailEasy™ turnbuckles fit 5/32" stainless steel wire rope and attach to termination points using stainless screws. Follow the three easy installation steps to produce an attractive, durable and clean looking railing system.

Be creative. This customer used components of our SunRail™ system to encourage flowers to climb.

3 Easy Installation Steps

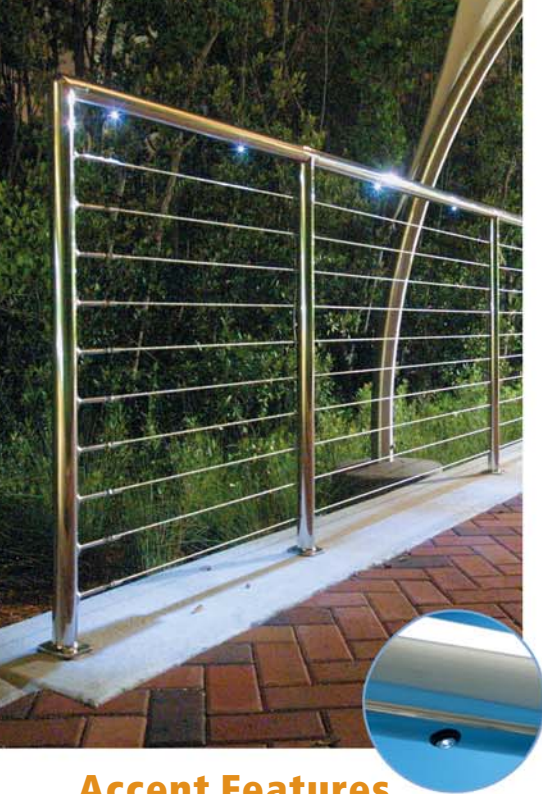

Step 1
Fully seat wire rope.

Step 2
Tighten cone onto receiver.

Step 3
Rotate body to tension wire rope.

Accent Features

MicroStar™ is a complete line of small, super bright white LED lights. These systems are available in both 12v and 24v and each draws only .02 amps. They provide sufficient levels of light to illuminate railing features without hot spots and dark shadows.

Compact Size

MicroStar™ LED lights are small enough to fit virtually anywhere. The image above displays the actual size of each unit.

MicroStar™ LED Lighting

FEATURES & BENEFITS

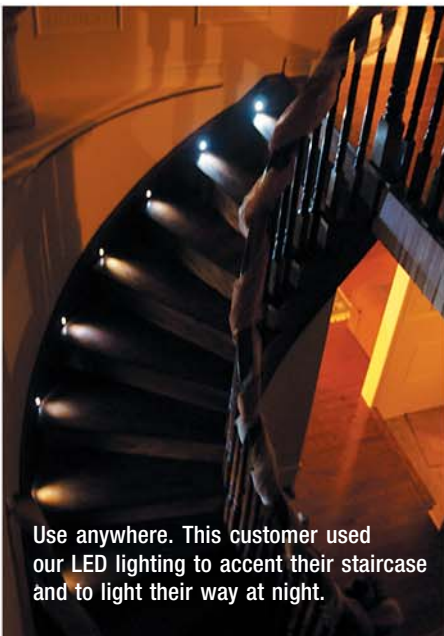

Small in Size	Measuring only 1/4" diameter and 7/8" in length, these units can fit almost anywhere with ease.
Low Wattage	Each MicroStar™ unit draws only 0.02 amps. Twenty-five MicroStar™ lights draw only 10 watts.
Added Value	Combines low power consumption with long life, providing long term savings.
Longevity	Long lasting LED light has an expected life cycle of 100,000 hours of use.
Durability	MicroStar™ LEDs are completely waterproof and encased in 316 stainless housing.

Field Tested in Demanding Situations

Each MicroStar™ has a bulb life of 100,000 hours or 7 years of continuous usage and stands up to the harshest environments.

Through multiple field tests, these units can be submersed in water up to 10 feet and remain functional. Being completely waterproof and encased in 316 stainless steel housings, these lights are able to stand up to the most demanding environments. MicroStar™ systems can be powered by solar battery, generator or 110v with converter. Control can be established by timer, relay or switch. Low voltage wiring is inexpensive and can be used anywhere.

Measuring only 1/4" diameter and 7/8" in length, these units can fit almost anywhere with ease. The small size and easy installation allow for endless design applications.

Use anywhere. This customer used our LED lighting to accent their staircase and to light their way at night.
